

Euromangan AD

Part of SES, the Special Projects team is at the forefront of specialist mining solutions. When Euromangan AD decided to raise production and safety at their Obrochishte manganese mine, they knew that they needed more than new equipment alone. They needed specialists capable of transporting it from the UK to Bulgaria, installing it without a hitch - and employing it rapidly, for maximum ROI.

SES experts delivered the equipment in 'flat pack' form, in a carefully planned process that dramatically shortened the time required for transport, re-assembly, installation, and safety checks. That meant our mining operatives could put the machinery to work as soon as possible. And, get local workers up-to-speed without unnecessary delays. With SES' Special Projects team, safety and efficiency go hand-in-hand.
